

## Sustainability Policy

**Euromec Contracts Limited** in support of Sustainability intends to:

- ✚ Minimise our contribution to global warming and other environmental effects of energy use by reducing the consumption of energy and by increasing energy conservation and energy efficiency
- ✚ To minimise the amount of waste for disposal where possible by:
  - Reducing the production of waste
  - Reusing materials
  - Recycling
  - Recovering energy from waste
- ✚ To reduce the levels of air, water and land pollution to the absolute minimum, including the provision of less polluting and more energy efficient modes of transport
- ✚ To reduce the environmental impact of goods and services through a sensitive purchasing policy, and the influence of companies, bodies or groups with whom we deal, by means of specifications or conditions to adopt the same standards
- ✚ To maintain indefinitely the balance and diversity of plant life on earth through local action to protect and care for a variety of plants and animals, geographical features and land forms around us
- ✚ To develop a safe, healthy environment that is clean, unpolluted, attractive, ecologically sound and free from dereliction and degradation
- ✚ To raise awareness to enable individuals to make informed decisions concerning environmental impact
